(54) Title: FOOT PROTECTION DEVICE FOR A FIGHT

(57) Abstract: Disclosed herein is a foot protection device adapted to protect feet when training and playing fighting games. The device includes an exterior cover (100). The exterior cover has an opening (10), an anterior hole (20) and a posterior hole (30) provided on a sole portion (A), toe insert parts (40) provided on a toe portion (B) and having toe holes (45), and an ankle securing means (150) provided at an end of an ankle portion (C). The device protects a wearer's feet, and is in maximally close contact with the feet due to its elastic force, and is light in weight, thus providing a sensation similar to that of a barefoot state. Further, a part of the foot is exposed to the outside, thus preventing the wearer from sliding on the ground surface, and allowing free movement of the foot, therefore affording a high level of power and quickness.
